

The European Knife Association

The, to be founded, European Knife Association is a necessity because of increasing legislation and restrictions all over in Europe. More and more buying, owning & carrying a knife is restricted and subject to legislation.

Knives are not considered a weapon but a tool. Some people might use it the wrong way. In most cases kitchen knives are used to commit crimes. But why restricting knives for 99% of our citizens who consider and use a knife as a tool and find joy in collecting, owning and carrying a piece of cutting art?

A knife was men's first tool. Without knives we still were living in caves, eating raw vegetables and living no longer then 30 years.

So we want to start educating civilians, politician and others. And we want to start a European lobby towards local and European politician to stop increasing legislation and restrictions. Before it is too late! We need your support wheter you are a knife enthusiast, collector, European manufacturer, knifemaker or retailer. We are aiming to get the association founded at the latest in 2020.
